

### Abstract of the Disclosure

An organizer attachment is provided for a vehicle sun visor having inside and outside major visor surfaces. The sun visor is pivotable between a raised position wherein the inside visor surface resides adjacent an interior ceiling of the vehicle and a lowered position wherein the outside visor surface resides adjacent a front windshield of the vehicle. The organizer attachment includes an organizer panel having opposing inside and outside major panel surfaces. At least one of the inside and outside panel surfaces defines an object storage area. At least one strap separate from the organizer panel is adapted for being attached to the sun visor. The strap has one of male and female fasteners for releasably mating with a complementary fastener carried by the organizer panel, such that the organizer panel is readily removed from the sun visor for transport outside of the vehicle.
